

WHAT IS @ L.A.B.S?

@ L.A.B.S. is a multidisciplinary action-oriented laboratory promoting lifelong learning via transformative collaborations to explore new horizons, address real world challenges and encourage experimentation in the realm of design and technology.

THE **L** **A** **B** **S** MODEL

The L.A.B.S. model, an acronym for Learn, Apply, Build, Scale, embodies a dynamic approach to education and innovation. The ultimate goal is fostering a culture of continuous learning and real-world application. L.A.B.S. offers a structured pathway for individuals to evolve from learners to proactive contributors.

VISION STATEMENT

Pioneering the Innovation of Tomorrow!

Our vision is to revolutionise innovation by creating a transformative space that transcends traditional boundaries. We envision a future where learning is immersive, multidisciplinary and empowers individuals across generations and professional backgrounds by being a catalyst for radical theoretical and technical innovation.

THE @ L.A.B.S COMMUNITY ACTION PLAN

Fostering Community Learning

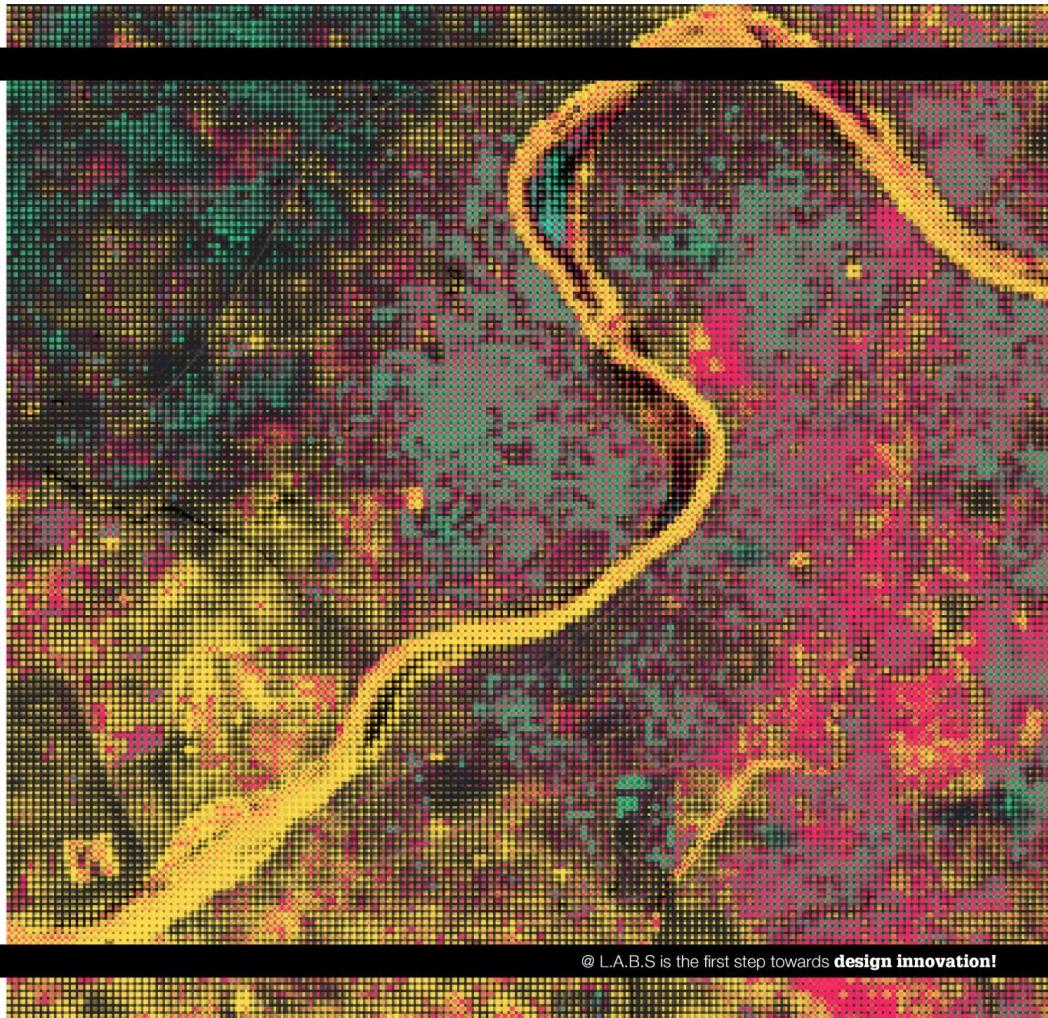

Cultivate an engaged and supportive community that actively participates in collaborative learning, knowledge-sharing, and idea exchange.

Curating Multi-Disciplinary Collaboration

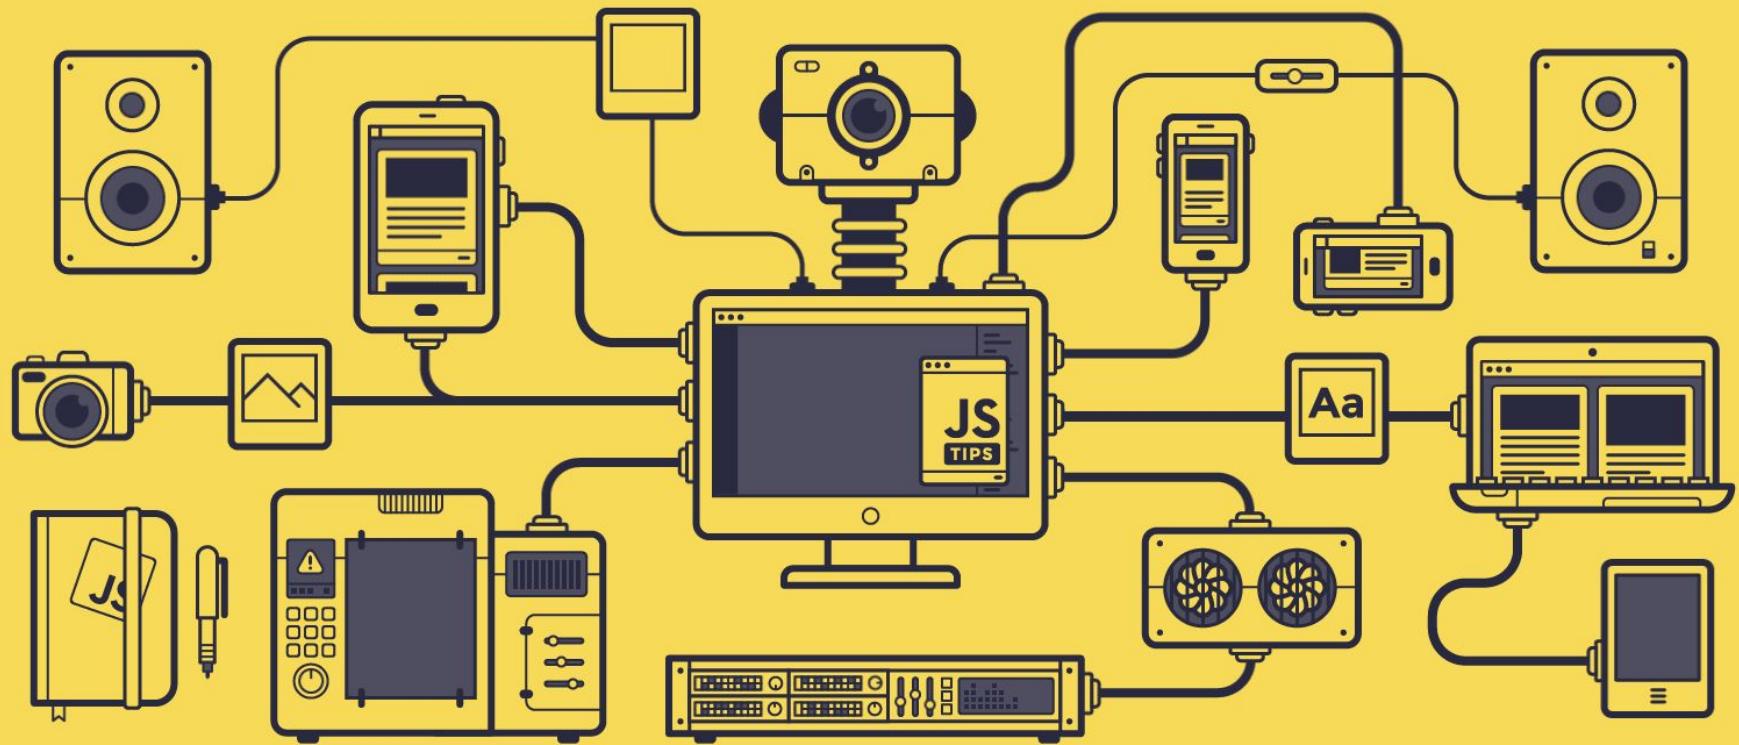

Encourage and facilitate collaborative projects and initiatives that bring together individuals from diverse backgrounds and disciplines.

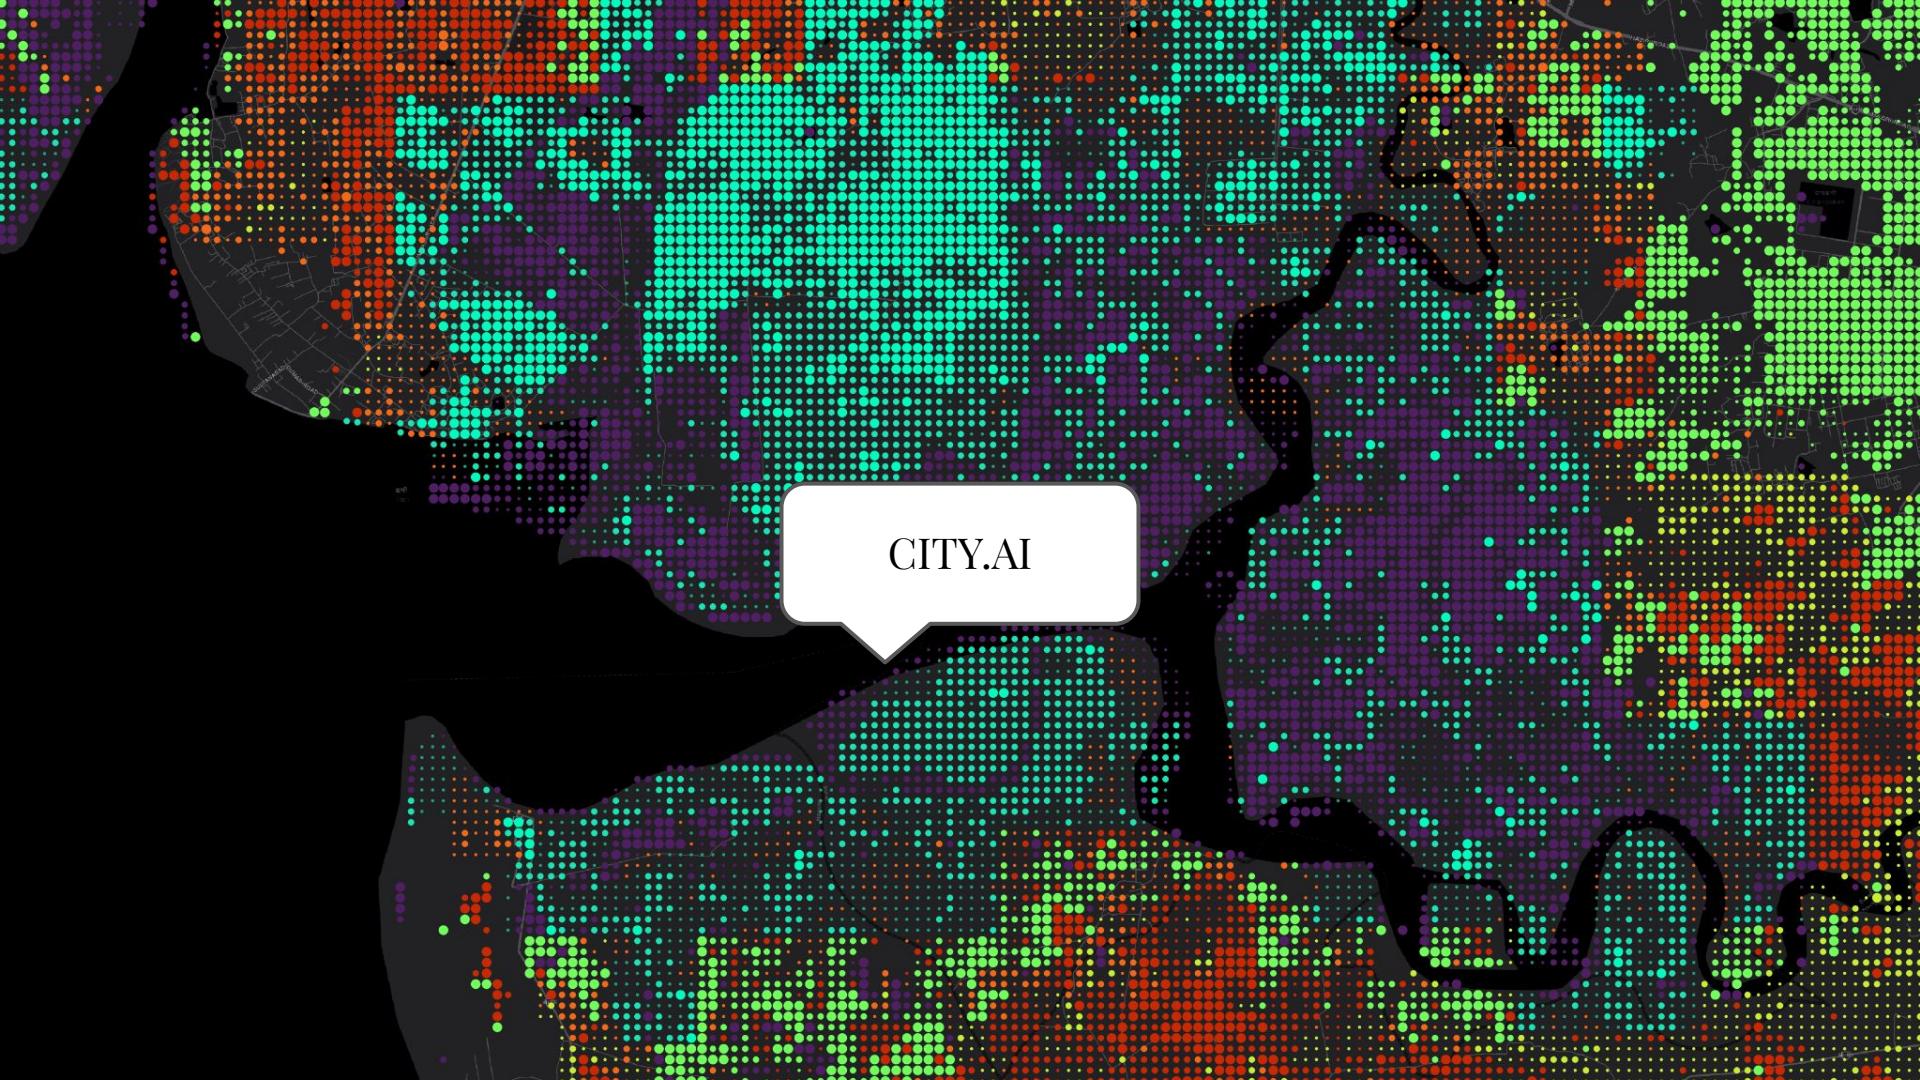

Creating a Global Network

Expand the reach of the community by fostering collaborations on a global scale, facilitating cross-cultural learning and exposure.

@ L.A.B.S is the first step towards **design innovation!**

AI

TYPES OF AI

Machine Learning

Uncovers structure and recognizes patterns in data to perform functions without being explicitly programmed.

Deep Learning

Performs classification tasks and recognizes patterns through an "artificial neural network".

Natural Language Processing (NLP)

Processes language to summarize, translate, or perform an action.

Expert System

Solves problems and simulates the judgment of an "expert"

Robotics

Enables machines to navigate and manipulate their environment.

Machine Vision

Visualizes surroundings and makes rapid decisions based on imagery

 gradio

The gradio logo consists of a stylized orange 3D block icon followed by the word "gradio" in a lowercase sans-serif font.

 Hugging Face

The Hugging Face logo features a yellow cartoon face icon next to the brand name "Hugging Face" in a white sans-serif font, all contained within a dark blue rectangular background.
